

Expressions of Interest open for the Net Zero Manufacturing Initiative

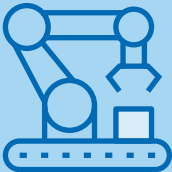

The NSW Government has introduced the \$275 million Net Zero Manufacturing Initiative to support NSW businesses and industries to remain leaders in the net zero transition by increasing their competitiveness, attracting investment and opening new growth opportunities.

Net Zero Manufacturing Initiative is a grant program spread across three programs

Clean technology innovation

Low carbon product manufacturing

Renewable manufacturing

Grant program summary

Description	 Clean Technology Innovation	 Low Carbon Product Manufacturing	 Renewable Manufacturing
Funding available	Up to \$25 million	Up to \$100 million	Up to \$150 million
How this funding can help your business	Accelerate the research, development and commercialisation of emerging clean technologies.	Expand and increase our local manufacturing capacity of low carbon products and materials.	Expand and increase our local manufacturing capacity of components for renewable energy.
How could the grant help your business	<ul style="list-style-type: none"> • Get new low emission technologies that have scalable and replicable potential market-ready. • Develop the capability to drive repeated and continued innovation. 	<ul style="list-style-type: none"> • Prepare for and establish new industrial facilities and manufacturing capabilities. • Create growth and profit from investment in new and emerging low carbon industries. • Become more diverse, self-sufficient, resilient and competitive by maximising local resources and industries. 	<ul style="list-style-type: none"> • Establish new industrial facilities and manufacturing capabilities. • Establish and increase local supply capacity of components for the renewable energy sector. • Create growth and profit from NSW's transition to renewable energy.
Examples of projects that might be funded	Clean technologies that support advancement in: <ul style="list-style-type: none"> • energy systems and electrification • land and primary industries • power fuels, including hydrogen. 	Production and manufacturing of low carbon: <ul style="list-style-type: none"> • building materials • chemicals • power fuels and biofuels derived from biomass • agricultural inputs. 	Production and manufacturing of: <ul style="list-style-type: none"> • renewable energy components (generation, storage and transmission) • hydrogen electrolyzers.

We're backing the next wave of innovators and manufacturers that will fast-track emissions reduction, create new jobs and drive economic growth across NSW.

Together we can make NSW a net zero technology and manufacturing superpower.
